Dear Mr. Doyle:

Re: Renovation of former
McKinley Thompson Landfill at
3200 South Harding Street
Marion County

I am enclosing a copy of the analysis of sludge from Lagoon #9 at the Belmont Avenue Sewage Treatment Plant. The analysis indicates a Cyanide content of 0.11 ppm which appears to be well within the limits of safety for removal to our site on Harding Street. *Enc. 1*

We are asking for your further approval to remove this sludge and dispose of it using the criteria outlined in your letter of August 9, 1978.

Please advise as soon as possible.

Sincerely,

W. Jack Lane
